## Academic data

### Holberton School Uruguay Machine Learning & AI

Jul. 2024 - Apr. 2025  
Ongoing

### Holberton School Uruguay Fundamentals of Computer Science

Jun. 2023 - Jul. 2024  
Completed

### IPA (Instituto de Profesores Artigas)

Mar. 2022 - Mar. 2023  
1st Year Complete  
Status Paused

## Technical tools

### Frameworks and Platforms:

- Firebase
- Node.js
- Flutter

### Programming Languages:

- Python
- Java
- JavaScript
- HTML
- CSS
- C / C++
- Dart

### Databases:

- MySQL
- NoSQL

### Tools and Technologies:

- Git
- Jira
- Figma

## Skills

- Effective communication
- Management of large teams
- Problem solving
- Mathematical thinking

## Languages

English: Technical

## About me

I am a graduate of Holberton School, where I gained extensive experience and skills in both back-end and front-end development. Currently, I am also pursuing a specialization in Machine Learning at Holberton School, which allows me to further expand my knowledge and skills in emerging areas of technology.

Also, my passion for mathematics led me to complete the first year at the Artigas Teachers Institute (IPA), although I had to put it on pause to fully dedicate myself to my training at Holberton School.

My professional focus and passion for technology and education drive me to continue learning and growing in this exciting field.

## Project

Apr. 2024 - Jun. 2024

I worked on an app called "Warded", in which I am responsible for the back-end, including sending notifications and managing the database.

Warded is a mobile app that creates secure communities through private groups. It allows sharing locations, sending real-time alerts and providing assistance to people with disabilities. It fosters community collaboration and solidarity for agile emergency response.

## Work experience

### Private teacher

Mar. 2022 - Jul. 2024

I would like to highlight amplitudes that I acquired in these years that I have been tutoring for all levels.

- Guidance and support in the completion of assigned homework and schoolwork.
- Preparation of students for exams and standardized evaluation tests.
- Correction of exams and exercises to know the student's progress.
- Reinforcement of skills and knowledge in specific areas of the school curriculum.
- Establishment of a safe, respectful and motivating learning environment.
- Promotion of study skills and time and resource management techniques.
- Providing support classes for students with learning difficulties.
- Delivery of face-to-face or virtual classes, through digital applications.
